Projects

Online Event Management System
- This is an Online event management system software project that serves the functionality of an event manager.
- The system allows only registered users to login and new users are allowed to resister on the application. This is a web application developed in Java and SQL.
- It allows the user to select from a list of event types. Once the user enters an event type e.g. (Marriage, Dance Show etc.), the system then allows the user to select the date and time of event, place and the event equipment's.

Declaration

I hereby declare that the details and information given above are complete and true to the best of my knowledge
